

## **zack for iPhone: combine up to three iPhone to one big screen.**

**Berlin, Germany 19th November 2015**, the Berlin startup [appfreu.de](http://appfreu.de) today released the app zack for iPhone®. zack turns your iPhone into a mobile cinema: Combine up to three iPhone and watch your videos on one big screen. Show what you can do with your iPhone: let's zack!

In 2014, four friends sat in a Berlin bar, watching a GoPro video from last weekend on one iPhone. Shoulder-to-shoulder and bent over the little screen they tried to enjoy the snowboard stunt in question without knocking over their drinks – and they realized: There has to be an app, that helps sharing videos wherever people are, in the best quality possible. Their idea: An app that allows to combine the screens of three iPhone to finally allow having fun with video wherever you are. Shortly after they founded the firm [appfreu.de](http://appfreu.de) and created zack.

Combining up to 3 iPhone **zack** adds an extraordinary momentum when you show off your most entertaining footage. Enjoy videos together, wherever you are, with the luxurious feeling of not having to crowd around a miniature screen - **let's zack** – because mobile videos deserve better.

See **zack** in action: [http://letszack.com/media/Tutorial\\_03.mp4](http://letszack.com/media/Tutorial_03.mp4)  
Or watch our promo video: <https://youtu.be/NSVQRfIToDk>

- It's possible to zack videos from the camera roll and with a stable internet connection and sufficient download speed even videos from the internet like from YouTube, Vimeo, GoPro and many more providers, or let's zack a live stream.
- zack allows to zoom the video during the playing process. By using two fingers, it's possible to zoom or move the video around on the screens.
- With zack your data belongs to you - there is no tracking at all.

## **Pricing and Availability**

**zack** is available on the App Store for just 2,99\$ / £2.29 / €2,99. **zack** is designed for iPhone®. **zack** works best on two or three iPhone 6 or 6s and requires iOS 9.

Launch day promotion: For the first 24 hours we are giving **zack** away for free. The app will be a free download on 19th November 2015 all day, worldwide.

Screenshots, icons and other related media are available for download from here: [www.letszack.com](http://www.letszack.com)

## **About [appfreu.de](http://appfreu.de)**

[appfreu.de](http://appfreu.de) is an operation founded and funded by four friends based in Berlin, Germany. When we are not thinking about mobile video solutions, we work in industrial, fashion and graphic design. “[appfreu.de](http://appfreu.de)” is about creating mobile experiences, which simply work and make you smile.

**zack** was developed in collaboration with the RWTH Aachen University.
